

University Medical Center (UMC-LJ)

The University Medical Centre - Ljubljana (UMC-LJ) is the largest public medical institution in Slovenia providing diagnostics and therapy, as well promoting clinical research and education with the main objectives in patients' care encouraging innovative and applicable knowledge in order to serve patients. The UMC-LJ has over 7,000 employees, who serve a population of over one million.

The Department of Rheumatology within UMC-LJ with Prof. Blaz Rozman and Prof. Matija Tomsic provides an optimal environment for epidemiological clinical studies and research of musculoskeletal conditions (inflammatory rheumatic diseases) with multidisciplinary approaches. It consists of an in-patient department, as well as out-patient care and the only emergency rheumatology care in the country. The Dept. of Rheumatology has been involved in several international epidemiological clinical studies.
